

I have been a modeler since I was 6 years old and was entirely military until about 20 years ago. When my son was 5 years-old I got a second-hand HO set that he promptly destroyed, so I got out my Lionel set from when I was a kid and it took the abuse. Over a 10 year period I became interested in modeling trains, and put together my "Carpet Central". A home addition gave me a train room and the first 3 rail layout, 12 x 15 feet was born. It was torn down prior to landscaping and a 15 x 22 shelf layout was born. I am a "High Railer", modeling 1/48 scale using 3 rail track. I have obtained 6 of 7 certificates toward my MMR and will have the last one accomplished soon!

Thanks,
Kevin
